NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 INFORMATION REGARDING THE GROUP

Valora is a retail group operating on a Europe-wide scale. Valora Holding AG is incorporated in Muttenz, Switzerland and its shares are listed on SIX Swiss Exchange. Valora's consolidated financial statements for the 2015 financial year were approved by the Board of Directors on March 3, 2016. These consolidated financial statements are subject to approval by the General Meeting of Shareholders to be held on April 14, 2016.

2 ACCOUNTING POLICIES

Basis of preparation. In preparing its consolidated financial statements Valora generally applies the historical cost principle. The exceptions to this are derivative financial instruments and financial assets available for sale, both of which measured at fair value. Consolidation is based on the individual group companies' financial statements, which are prepared according to a uniform set of accounting principles. The Group presents its accounts in Swiss francs (CHF). Unless otherwise stated, all values are stated in thousand Swiss Francs.

Compliance with IFRS, the Swiss Code of Obligations and Swiss Stock Exchange listing rules. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with the legal provisions of the Swiss Code of Obligations. They also meet all the listing regulations promulgated by the SIX Swiss Exchange.

Key accounting principles. In addition to the accounts of Valora Holding AG, Muttenz, Switzerland, the Valora Group's financial statements also comprise those of its subsidiaries and non-consolidated investments as follows:

Consolidated companies. Subsidiaries controlled by Valora Holding AG are fully consolidated. In determining whether control exists, the contractual provisions governing Valora's interest in such companies are considered as are Valora's other rights. Subsidiaries acquired are consolidated from the day Valora assumes control and deconsolidated from the day Valora ceases to exercise such control.

Consolidation method. All intra-Group assets, liabilities, income and expenses, and all unrealised gains or losses in intra-Group transactions, are fully eliminated. Whenever companies are acquired, all identifiable assets, liabilities and contingent liabilities of the acquired entity are recognised at fair value at the acquisition date, and the difference between the purchase price paid and the fair value of the company's net assets at the time of the acquisition is recognised as goodwill. Non-controlling interests are defined as that part of the equity of a subsidiary which is not directly or indirectly attributable to the shareholders of Valora Holding AG. Non-controlling interests are presented separately in the consolidated income statement, consolidated statement of comprehensive income and the balance sheet. In the Group balance sheet, non-controlling interests are shown in the equity section, but are reported separately from the equity attributable to shareholders of Valora Holding AG. Acquisitions of non-controlling interests are treated as equity transactions, with the difference between the consideration paid and the carrying amount of the net assets acquired being allocated to the equity attributable to the shareholders of Valora Holding AG.

Non-consolidated investments (associated companies and joint ventures). Associated companies and joint ventures are accounted using the equity method. Associated companies are companies over which Valora has significant influence, but does not control. Significant influence is assumed to exist when Valora holds between 20% and 50% of the voting shares. Joint ventures are based on joint arrangements between the parties concerned, each of which has rights to the net assets of the joint-venture entity. Investments in associates and joint ventures are initially recognised at cost and adjusted thereafter for the Group's share of past acquisition income, other income and other changes in equity. Dividends received are recorded against the investment's carrying amount.

Scope of consolidation. Note 39 provides an overview of the Valora Group's significant subsidiaries.

Changes in consolidation scope. On February 27, 2015, Valora acquired 100 % of the shares of the small-outlet retailer Naville (LS Distributions Suisse SA), which operates in the French-speaking part of Switzerland and had its registered offices in Geneva. Further details of this transaction are set out in Note 6.

Valora sold its goods logistics unit (Valora Warenlogistik AG) to 7Days Media Services GmbH on May 30, 2015.

On December 31, 2015, Valora completed the sale of its Trade division to the Aurelius Group comprising all Valora Trade companies in Switzerland, Austria, Denmark, Sweden, Norway and Finland. Note 7 provides further details.

On July 31, 2014, Valora sold its Services division to Thomas Kirschner, the majority shareholder in PVG, the leading German press wholesaler, whose registered offices are in Frankfurt am Main. Full details of the transaction are set out in Note 7.

3 CHANGES TO ACCOUNTING POLICIES

Implementation of new International Financial Reporting Standards (IFRS) and Interpretations thereof. The adoption of the changes to International Financial Reporting Standards (IFRS) and interpretations for the first time required for the 2015 accounts did not materially affect the Valora Group's financial statements.

Future implementation of International Financial Reporting Standards (IFRS) and Interpretations thereof. The Annual Improvements 2012–14 Cycle (annual improvement process) will become applicable with effect from January 1, 2016. This will not have any material effect on the financial statements of the Valora Group.

With effect from January 1, 2018, the Valora Group will be required to apply the revised IFRS 15 (Revenue from Contracts with Customers) and IFRS 9 (Financial Instruments) standards. These have not yet been adopted and their impact is currently being evaluated. IFRS 16 replaces IAS 17 and sets out the principles applying to the recognition, measurement, presentation and disclosure of lease contracts. For Valora, the main impact of IFRS 16 is that it requires the lessee to recognise the liabilities and assets arising from practically all its lease contracts. This will increase Valora's overall assets and liabilities. Valora is currently evaluating the precise effects of this new standard, whose implementation will first be required for the reporting period commencing on January 1, 2019.

4 GENERAL ACCOUNTING POLICIES

Translation of foreign currencies. Transactions in foreign currencies are converted into Swiss francs at the exchange rate applicable on the transaction date. At the balance sheet date, amounts receivable and payable in foreign currencies are converted into Swiss francs at the exchange rate applicable on that date, and any exchange rate differences are recorded in the income statement.

Upon consolidation, the assets and liabilities of subsidiaries whose functional currency is not the Swiss franc are converted into Swiss francs at the exchange rate prevailing on the balance sheet date. Income statement, cash flow statement and other movement items are converted into Swiss francs at average exchange rates for the period, provided they approximate the figures which would result from the application of transaction date rates. If not, transactions are converted at effective transaction rates. Exchange gains and losses arising from the translation of foreign operations are recognised in other comprehensive income and reported separately as currency translation adjustments.

Exchange rates applied to key foreign currencies

	Average rate for 2015	Rate at December 31, 2015	Average rate for 2014	Rate at December 31, 2014
Euro, 1 EUR	1.068	1.084	1.215	1.203
Swedish krona, 100 SEK	11.42	11.79	13.36	12.74
Danish krone, 100 DKK	14.32	14.52	16.29	16.15
Norwegian krone, 100 NOK	11.95	11.28	14.54	13.34

Net revenues and revenue recognition. Net revenues include proceeds from the sale of goods, services and products manufactured by Valora itself, net of any deductions including rebates, discounts and other agreed concessions. Retail sales by the Valora Retail division are recognised upon sale to the customer. Payment is made in cash or by credit card. The sales value recorded is the amount received net of credit card fees. Wholesale revenues are recognised when the goods have been delivered, the customer has accepted them and there is sufficient certainty of the amount being received. Goods sold in the wholesale business may be sold on a return basis. In this case, net revenues will be reduced by estimated return rates based on experience and other appropriate assumptions. The commission Valora received from the sale to third parties is recognised in net revenues.

Share-based remuneration. The Valora Group pays some of the remuneration it grants in the form of Valora shares. The expense from this is recorded in the income statement and is calculated by multiplying the number of shares granted by the market price prevailing on the grant date (minus any amount payable by the recipients). The expense arising from schemes which will definitely be paid out in shares (equity settled schemes) is accrued against equity. The expense from schemes where payment in shares is not foreseen is accrued as a liability. If the conditions for the allocation of shares extend over several years, the relevant expenses are accrued in appropriate proportions to the years concerned, based on the degree to which the targets are expected to be achieved. Equity settled share-based remunerations are credited to retained earnings. For cash-settled share-based payments a liability is recognised and remeasured at fair value at each reporting date until settlement.

Net financial results. Net gains and losses on the valuation of financial instruments at balance sheet dates which are credited or debited to the income statement do not include any dividend or interest payments. Dividend and interest income is reported separately (see note 13).

Income tax. Income tax is calculated based on the tax laws of each applicable jurisdiction and is charged to the income statement for the accounting period in which the net income arises. The applicable effective tax rates are applied to net income.

Deferred taxes which arise as a result of temporary differences between the values of assets and liabilities reported on the balance sheet and their applicable tax values are shown as deferred tax assets or deferred tax liabilities. Deferred tax assets are recognised when it is probable that future taxable income will be available to offset against them. Deferred income taxes are calculated based on the tax rates which are expected to apply in the period in which the deferred tax asset or liability is expected to be realised or settled. Deferred tax liabilities on temporary differences are generally recorded. Taxes receivable are offset against taxes payable if they relate to the same taxable entity and there is an enforceable legal basis for them to be offset against each other. Changes to deferred tax liabilities or assets are reported as tax expense or income in the income statement. This does not apply to deferred taxes relating to positions which are either shown under other comprehensive income or are accrued directly to equity.

Disposals of business units. When control over business units included in continuing operations ceases because they are sold, the operating results until that date are included under the appropriate line items in the income statement and cash flow statement.

Net profit/loss from discontinued operations. When business segments or significant business areas are sold, all the income statement items relating to these units are aggregated and shown in a separate income statement line as results from discontinued operations. The cash flow statement shows detailed cash flows from continuing operations only. The net cash flows from discontinued operations generated by operating, investing and financing activities are disclosed separately in one line each.

Earnings per share. Earnings per share are calculated by dividing the net profit (or loss) of Valora Holding AG attributable to its shareholders (which, in this report, have been subdivided into the portions attributable to continuing and discontinued operations as required by IAS 33) by the average number of outstanding shares of the Valora Holding AG parent company. Diluted earnings per share take account of the dilutive effects of potential changes to the number of outstanding shares and adjust earnings per share accordingly.

Cash and cash equivalents. Cash and cash equivalents comprise cash balances, demand deposits with banks and short-term money market investments with a maturity not exceeding 3 months.

Trade accounts receivable. Trade accounts receivable are recorded at amortised costs minus any necessary adjustments for doubtful accounts. Adjustments are made if there is objective evidence that the amount may not be received in full.

Inventory. Inventory is carried at the lower of purchase or manufacturing cost and their net realisable value. For Valora's Retail division, inventory is valued at average purchase cost, based on a moving average method. Ditsch/Brezelkönig values both its finished and unfinished products at their production cost, while all other inventory items are valued at average purchase cost based on a moving average method. Slow-moving or obsolete inventory items are valued according to standard business practices, with the items in question being partially or wholly written off.

Non-current assets held for sale. Non-current assets are classified as held for sale and valued at the lower of carrying amount or fair value less costs to sell, if their carrying amount is expected to be realised principally from sale rather than from their continued use. The assets in question must be immediately saleable and there must be a high probability that their sale will occur within one year from classification as held for sale. If entire business units are held for sale, all their assets and all their directly attributable liabilities are recorded in the balance sheet separately as assets or liabilities held in disposal groups.

Property, plant and equipment. Property plant and equipment is recorded at cost minus accumulated depreciation. Subsequent expenditure for renovation is capitalised only if the costs can be reliably determined and an economic benefit results from them. If these conditions are met, the renovation costs so capitalised are depreciated over the useful life of the property. All other repair and maintenance costs are expensed directly to the income statement. Capitalised extensions and installations in rented premises are depreciated over their estimated economically useful life or the remaining rental lease term, if this is shorter. The interest costs relating to facilities which have been under construction for longer periods of time are capitalised.

Depreciation is charged on a linear basis over the estimated useful life as follows:

	Years
Land for operational use	no depreciation
Buildings and building components, operational	15–40
Machinery, equipment, fixtures and fittings	6–10
Vehicles	5
IT hardware	3–5

Investment property. Investment property is recorded at purchase or construction cost less accumulated depreciation. The fair values reported in these notes are based on current estimates of their income-generating capacity. Subsequent expenditure for renovation is capitalised only if the costs can be reliably determined and an economic benefit results from them. If these conditions are met, the renovation costs so capitalised are depreciated over their useful economic life. All other repair and maintenance costs are expensed directly to the income statement.

Depreciation is calculated and charged on a linear basis over the estimated useful life as follows:

	Years
Land	no depreciation
Buildings	20–60

Impairments of property, plant and equipment. The carrying amount of property, plant and equipment are reviewed whenever changing circumstances or specific events suggest that their carrying amounts might be too high. If the carrying amount of an asset exceeds its recoverable fair value, which is defined as the higher of fair value less costs of disposal and value in use, the asset will be written down to its recoverable value. An impairment may be reversed only if the assumptions previously used in determining the recoverable value of the asset concerned have been subject to change. If such a change has occurred, the carrying amount of the asset in question will be raised to its current recoverable value. This new recoverable value may not, however, exceed the value at which the asset would have been carried if no previous impairments had occurred and it had simply been subject to regular straight-line depreciation. Any increase in value resulting from such a reversal is recorded in the income statement immediately.

Government grants. Government grants are recognised at their fair value provided the Group meets the conditions for receiving them. Grants which do not relate to investments are recognised in the income statement under other income in the period in which the expense to which the grant relates was incurred. Investment grants are recognised as reductions in the purchase or production cost of the asset concerned and result in a corresponding reduction of the scheduled depreciation charges applied to it in subsequent periods.

Leases. Assets acquired under lease agreements which substantially transfer the benefits and risk of ownership from the lessor to the lessee are classified as non-current assets of the relevant category. Assets acquired under finance leases are initially capitalised at the lower of fair value or the net present value of all binding future lease payments contracted at the beginning of the lease. On the liabilities side this same amount is recognised as a finance lease liability. Leased assets are depreciated over their anticipated economically useful lives or the life of the lease if this is shorter and transfer of ownership at the end of the lease is not certain.

Similarly, non-current assets leased to third parties under agreements transferring substantially all the benefits and risks of ownership to the lessee are classified not as property, plant and equipment but as financial assets, recorded at the present value of the future lease payments to be received. Expense and income arising from operating leases is recognised in the income statement in a linear fashion over the life of the leases.

Intangible assets, excluding goodwill. Intangible assets are classified into one of the following three categories: software, intangible assets with finite useful life or intangible assets with indefinite useful life. All intangible assets, excluding goodwill, are carried at historical costs less accumulated amortisation. Amortisation is applied using the straight line method over the estimated useful life of the intangible asset concerned.

Software. The purchase or production costs of software are recognised on the balance sheet if Valora expects to derive future economic benefit from the software concerned.

Intangible assets with indefinite useful life. Intangible assets with indefinite useful life are not subject to scheduled amortisation charges. They are subject to an impairment test at least once a year, with impairment charges being recorded against them as required.

Amortisation is charged on a linear basis over the estimated useful life as follows:

	Years
Software	3 – 5
Intangible assets with finite useful life	3 – 20
Intangible assets with indefinite useful life	no amortisation

Impairments to intangible assets. The carrying amounts of intangible assets excluding goodwill are reviewed whenever changing circumstances or specific events suggest that their carrying amounts might be too high. If the current carrying amount of an asset exceeds its recoverable value, which is defined as the higher of its current fair value minus costs of disposal or its value in use, the asset will be written down to its recoverable value. An impairment (other than one made to goodwill) may be reversed only if the assumptions previously used in determining the recoverable value of the asset concerned have been subject to change. If such a change has occurred, the carrying amount of the asset in question will be raised to its current recoverable value. This new recoverable value may not, however, exceed the value at which the asset would have been carried after regular amortisation and if no previous impairments had occurred. Any increase in value resulting from such a reversal is recorded in the income statement immediately.

Goodwill. Goodwill is the amount paid by the Group when acquiring a company which exceeds the fair value of that company's net assets at the time of purchase. Goodwill is recognised on the balance sheet in accordance with IFRS 3, and is attributed to the appropriate cash generating unit (CGU). The CGU is then subjected to an impairment test, which is carried out at least once a year, and more frequently should there be evidence suggesting possible impairment. This involves comparing the carrying amount of the CGU to which the goodwill was assigned with the CGU's current recoverable value. This recoverable value is defined as the higher of the fair value of the CGU less costs of disposal and its value in use. Fair value less costs of disposal is the price which would be received from the sale of an asset in an orderly transaction between market participants at the measurement date or which would be payable when a liability is transferred. If the carrying amount of the cash-generating unit exceeds this recoverable amount, an impairment of the goodwill will be recorded. Goodwill impairments cannot be reversed.

Financial assets. Financial assets are classified according to one of the following categories:

- at fair value through profit or loss
- loans and receivables
- available for sale

Classification depends on the purpose for which the financial assets were acquired and is determined when the assets are first recognised.

Financial assets at fair value through profit or loss. These include financial assets and derivative financial instruments held for trading purposes, as well as other assets designated to this category on initial recognition. Financial assets are designated to this category if they are acquired with a view to short-term sale. Financial assets in this category are either held for trading purposes or sold within 12 months of purchase.

Loans and receivables. Loans and receivables are financial assets whose payment dates and amounts are either fixed or can be determined and which are not traded in a market. They include the trade accounts receivable and other receivables which are shown separately on the balance sheet. They are classified as current assets unless their maturity is more than 12 months after the balance sheet date.

One Valora Group company sells its loan receivables to a bank. Since these sales transfer the principal risks associated with these loans to the bank, these positions have been derecognised of the balance sheet. Under certain contractually defined circumstances, which would arise in the event of a non-conforming loan agreement been signed with the borrower, the bank is entitled to reverse the sale of the loan concerned. The risk in such an event is limited to the value of the loan receivable.

Financial assets available for sale. This category covers investments in equity securities of less than 20% and financial assets not assigned to any other category. Financial assets available for sale are classified as non-current assets unless they are intended to be sold within 12 months.

All purchases and sales of financial assets are recorded on the trade date. Financial assets, except those held at fair value through profit and loss, are initially recorded at fair value plus transaction costs. Financial assets held for trading purposes are initially recorded at fair value excluding transaction costs and thereafter, like all other "at fair value through profit or loss" assets, at their fair value. Loans and receivables are recorded at amortised costs calculated by the effective interest rate method. Financial assets available for sale are carried at fair value, using market prices where available or model-based valuations where no market exists. Investments in unquoted equity securities which are not traded in a market and for which insufficient data is available to perform a valuation are carried at cost (minus any impairments). Unrealised gains and losses of available for sale instruments are credited or debited to other comprehensive income. A significant or prolonged decrease in fair value below costs represents an impairment loss and is charged to the income statement. When an available for sale financial asset is sold, the valuation adjustments which have been accumulated against equity in respect of it are passed on to the income statement.

Interest-bearing debt. Interest-bearing liabilities are valued at amortised costs, any differences between such cost and the amounts repayable at maturity are recognised as financial expense over the lifetime of the liability according to the effective interest method.

Accounting for derivative financial instruments and hedging transactions. Positions in derivative financial instruments are recorded at their value when established and adjusted thereafter to reflect changes in fair value. Recognition methods for gains or losses depend on whether the instrument was used to hedge an identifiable risk and whether the conditions for hedge accounting are met. The objective of recognising a transaction as a hedge is to ensure that changes in the value of the item being hedged and those in the hedging instrument offset each other during the time the hedge is in place. If a derivative financial instrument is not designated as a hedge or if it does not meet hedge accounting criteria, gains and losses arising from changes in its fair value are recognised in the income statement. To qualify for hedge accounting, a hedging transaction must meet a number of strict criteria relating to transaction documentation, probability, hedge effectiveness and valuation reliability. When engaging in a hedging transaction, the Group documents the relationship between the hedging instrument and the hedged item and the purpose and strategy of the hedge. This process also requires that all derivatives used for hedging purposes be linked to

specific assets or liabilities, or to firm commitments and expected future transactions. Both when a hedge is set up and during its life the Group documents the extent to which changes in the fair value of the derivative financial instrument offset changes in the value of the item it hedges.

When the contract governing it is concluded, any derivative financial instrument which qualifies as a hedging transaction will be classified either as a) hedging the fair value of a specific asset or liability (a fair value hedge), b) hedging future cash flows arising from an expected future transaction or a firm commitment (a cash flow hedge), or c) hedging a net investment in a foreign subsidiary.

Any gains or losses from hedging instruments which effectively offset changes in the value of future cash flows, and thus qualify as cash flow hedges, are booked to other comprehensive income. Gains or losses which do not meet this effectiveness requirement are immediately recorded in the income statement. The amounts recorded under other comprehensive income are then transferred to the income statement when the underlying transaction affects profit or loss.

If the requirements for hedge accounting treatment are no longer met, any gains and losses accumulated under other comprehensive income will remain in equity until the underlying transaction for which the hedge was established has occurred. If the underlying transaction is no longer expected to occur, these accumulated gains and losses will immediately be passed to the income statement.

Provisions. Provisions are recorded when, as a result of a past event, an obligation has arisen whose amount can be reliably estimated and for whose settlement an outflow of cash is probable. Provisions are recorded at the net present value, as of the balance-sheet date, of the estimated future cash outflow.

Liabilities from employee pension schemes. Valora pays employer contributions to various pension schemes established according to local legislation. For defined benefit schemes, the present value of the benefit obligation is determined by an annual actuarial assessment under the projected unit credit method. These assessments take account of the contribution years accumulated by employees at the assessment date as well as the expected evolution of their future remuneration. The pension cost to the employer and the net interest cost or net interest income relating to the net pension liability or net pension asset will be recognised in the income statement in the period in which it occurs. Actuarial gains and losses and the effect of any ceiling applied to the net pension fund assets (IFRIC 14) are accumulated under other comprehensive income.

Expenses for defined contribution pension schemes are charged to the income statement in the period in which they are incurred.

5 MANAGEMENT'S ESTIMATIONS, ASSUMPTIONS AND EXERCISE OF DISCRETION

Significant judgements in the application of accounting principles. The application of accounting principles requires judgement by management which – while no estimates are used to this end – may have a significant influence on the figures reported in the consolidated financial statements.

Management assessments are needed in the analysis of the substance of complex transactions.

Significant estimations. Preparation of the consolidated financial statements under IFRS requires the use of estimations regarding the future and may have an influence on the amount of certain items reported in the income statement, the statement of comprehensive income, the balance sheet and their explanatory notes. Any estimations underlying the figures reported in the consolidated financial statements are based on experience and the information available at the time the statements were prepared. Estimations and assumptions are reviewed regularly and adapted where necessary. Nevertheless, subsequent actual outcomes may differ from earlier estimations. Any changes resulting from revisions of estimated values are recognised in the consolidated financial statements in the year in which such revisions are made. Estimations and assumptions bearing significant risks of substantial future changes to carrying amounts are listed below:

Property, plant and equipment. The useful life of property, plant and equipment is determined based on experience and the current technical characteristics of the assets concerned. The actual useful life of a specific asset may deviate from that initially determined due to changes in technology and market conditions. In the event of such a deviation, the remaining useful life of the asset concerned is adjusted. The value of non-current assets is always re-assessed whenever changes in circumstances indicate that their current carrying amount may exceed their fair value. Fair value is determined on the basis of estimates and management's assumptions about the economic utility of the assets concerned. Values subsequently realised can deviate from these estimates (see note 20).

Goodwill and brand rights. The consolidated balance sheet carries goodwill from continuing operations at CHF 417.1 million (see note 22). This goodwill is subjected to an impairment test whenever there are indications that the recoverable amount of the cash generating unit to which it has been allocated may have diminished and in any event at least once annually. The impairment tests are based on estimated future free cash flows, using discounted cash flow analysis, for each of the cash generating units concerned. The principal factors affecting these valuations are the estimated net revenues, estimated operating margins and the discount rate applied.

Net pension asset and liability. The Group maintains occupational pension schemes of its own which are classified as defined benefit schemes for IFRS purposes. IFRS requires an annual comparison of the pension plans' assets and liabilities with the dynamically calculated net present value of their benefit obligations. These valuations showed a pension plan surplus for the Swiss schemes which is capitalised in the consolidated balance sheet and which corresponds to that portion of the surplus/deficit which the Group is entitled to offset against its benefit obligations under the plans concerned. These valuations are based on a number of assumptions, most important are the discount rate applied to future benefits and the expected future salaries of the plan participants (see note 30). Actual outcomes may diverge considerably from the assumptions made.

Deferred income tax assets. Under IFRS rules, that portion of any tax loss carry forwards which can be expected to result in future tax savings should be recognised as a deferred tax asset (see note 14). The amount of tax savings which are then actually achieved will depend on the level of income generated before the tax loss carry forwards expire. This means that future net income may be impacted by impairments on deferred tax assets if the taxable income the Group generates during the relevant period are below initial expectations. Conversely, additional net income may be recognised if the profits the Group generates exceed expectations and previously unrecognised tax loss carry forwards can be used.

Provisions. Provisions are established for obligations whose amount and/or due date cannot be determined with certainty and a future cash flow is probable. A further prerequisite for the creation of such provisions is that the amount of the potential loss can be reliably estimated. In assessing whether a provision is appropriate and what its amount should be, the best available estimates and assumptions are made with regard to the situation as of the balance sheet date. Since new evidence and unfolding events can have a significant effect on subsequent outcomes, earlier estimates and assumptions may be revised in the light of later evidence and events, if their effect on these estimates and assumptions is substantial (see note 29).

6 ACQUISITIONS OF BUSINESS UNITS

Acquisition Naville. On February 27, 2015, Valora acquired 100% of the shares of Naville (LS Distribution Suisse SA), a leading small-outlet retailer in French-speaking Switzerland, from Lagardère Services and Tamedia Publications Romandes. Naville, whose registered offices are in Geneva, operates a network of more than 175 outlets. It also has one of the most important logistics platforms in French-speaking Switzerland. Naville is being integrated into the Retail division.

Net assets purchased, purchase price, net cash used

	Naville Fair Value
in CHF 000	
Current assets	69 297
Non-current assets	38 913
Deferred income tax assets	4 820
Current liabilities	-52 071
Deferred income tax liabilities	-7 758
Other non-current liabilities	-19 838
= Net assets acquired	33 363
Goodwill from acquisition	78 518
= Purchase price	111 881
Cash and cash equivalents acquired	-25 861
= Cash used in acquisition of subsidiaries	86 020

The goodwill of CHF 78.5 million reflects the synergies the acquisition is expected to generate. Goodwill is not tax deductible.

Current assets include accounts receivable valued at CHF 15.8 million. No allowance has been recorded against this position and the entire contractually agreed amount is expected to be recoverable.

From the time of its acquisition by Valora till December 31, 2015, Naville contributed CHF 240.0 million to Group net revenues and CHF 10.7 million to Group net profit. If the acquisition had taken place on January 1, 2015, Naville's net-revenue contribution would have been CHF 296.3 million and its contribution to Group net profits would have been CHF 11.6 million.

The goodwill position was fully attributed to the Retail segment.

The total transaction costs directly attributable to the acquisition amount to CHF 3.3 million.

7 DISCONTINUED OPERATIONS

Transactions completed in 2015.

Valora Warenlogistik AG. Valora sold its goods logistics unit (Valora Warenlogistik AG) to 7Days Media Services GmbH on May 30, 2015. The two companies signed a number of contracts in connection with this transaction governing the transfer of warehousing and transport services for Valora Retail to 7Days Media Services GmbH and the sale of the operational infrastructure on which those services are based.

Valora Trade. On December 31, 2015, Valora completed the sale of its Trade division to the Aurelius Group. Aurelius is an exchange-listed group, specialising in the acquisition and strategic realignment of companies. The purchase agreement encompasses all Valora Trade companies in Switzerland, Austria, Germany, Denmark, Sweden, Norway and Finland. The sale of Trade Germany was expected to be completed during January 2016.

¹⁾ This comprises impairment charges to goodwill and intangible assets amounting to CHF 17 259 thousand.
Had these not occurred, EBIT would have been CHF -1601 thousand.

8 SEGMENT REPORTING

The Valora Group is a retail company operating on a Europe-wide scale, with business activities carried out in the following reportable business segments:

Valora Retail: Valora Retail operates small retail outlets at heavily frequented locations in Switzerland, Germany, Luxembourg and Austria. The division operates country-wide marketing and distribution systems for press, tobacco and consumer products for daily use and the impulse buyer's market. Valora Retail's market presence comprises the k kiosk, k presse+ buch, avec., P&B, Naville, tabacon, ServiceStore DB, CIGO and Caffè Spettacolo formats.

Ditsch/Brezelkönig: Ditsch/Brezelkönig produces lye-bread and other bakery products in Germany and Switzerland. These are distributed both to its Ditsch/Brezelkönig outlets and to the wholesale sector.

Other: The Group support functions in the areas of Finance, Human Resources, Business Development, Legal Services and Communications as well as bob Finance are reported under "Other". The assets attributable to these support functions represent principally loans to Group companies, cash and cash equivalents, and short-term receivables. The liabilities attributable to this segment essentially relate to the financing instruments listed in note 26.

At Valora, these segments comprise a variety of retail formats and geographical regions. The net revenues generated by these segments mainly relate to the sale of goods. Their non-current assets comprise property, plant and equipment, investment property and intangible assets (additions to which are shown without changes in consolidation scope). Valora's internal reporting is based on the same valuation principles as its external reporting.

Segment data by division

9 PERSONNEL EXPENSES

	2015	2014
in CHF 000		
Salaries and wages	222 923	225 811
Social security expenses	39 774	38 644
Share-based remuneration	883	514
Other personnel expenses	13 481	12 442
Total personnel expenses	277 061	277 411
Number of employees (full-time equivalent basis) at December 31	4 349	4 435

Social security expenses include CHF 457 thousand (CHF 413 thousand in 2014) in respect of defined contribution pension plans. Other personnel expenses essentially comprise remuneration for temporary staff paid to employment agencies, staff training costs and personnel recruitment costs. Despite the Naville acquisition, total staff numbers declined in 2015, principally as a result of the expansion of the agency network.

10 OTHER OPERATING EXPENSES

	2015	2014
in CHF 000		
Rental expenses	165 138	162 939
Real-estate expenses	7 625	7 205
Ancillary rental expenses	27 628	25 391
Agency fees	133 193	97 490
Insurance	1 216	1 412
Communications and IT	25 209	23 897
Advertising and sales	13 296	10 942
Shipping and freight	24 299	20 947
General administration	26 200	25 242
Capital and other taxes	1 229	913
Other operating leases	3 100	2 334
Other operating expenses	29 420	29 160
Total other operating expenses	457 553	407 872

The increase in other operating expenses in 2015 is essentially due to the Naville acquisition.

11 OTHER INCOME AND OTHER EXPENSES

	2015	2014
in CHF 000		
Rental income	713	1 289
Gains from disposal of non-current assets	161	945
Other income	7 302	13 752
Total other income	8 176	15 986

Other income for 2015 includes service income of CHF 3967 thousand generated by Valora for the ongoing provision of administrative services to the successor organisation of its former Services division. The remainder of the other income reported for 2015 essentially comprises the derecognition of long-term liabilities, payments received from insurers and reimbursements.

Other income for 2014 includes service income of CHF 2980 thousand in 2014 which was generated after the sale of the Services division for the ongoing provision of various administrative functions. In addition, contingent considerations amounting to CHF 7640 thousand relating to the acquisition of Convenience Concepts and Delvita Salty Snacks were released to the income statement in 2014.

	2015	2014
in CHF 000		
Losses from disposal of non-current assets	-1 122	-3 879
Other expenses	-137	-2 108
Total other expenses	-1 259	-5 987

12 FINANCIAL EXPENSES

	2015	2014
in CHF 000		
Cost of bank loans and liabilities	6 752	8 636
Interest on bonds issued	6 779	6 779
Interest on finance leases	84	159
Foreign exchange losses, net	5 238	2 007
Total financial expense	18 853	17 581

13 FINANCIAL INCOME

	2015	2014
in CHF 000		
Interest earned on cash, cash equivalents, loans and receivables	189	148
Interest income from finance leases	249	274
Net gains from derivative financial instruments	1 148	12
Dividend income from financial investments available for sale	33	30
Total financial income	1 619	464

14 INCOME TAXES

Income tax expenses were as follows:

	2015	2014
in CHF 000		
Current income tax expenses	4 904	4 454
Deferred income tax income	-13 826	-6 528
Total income tax	-8 922	-2 074

The differences between reported Group income tax expense and the expected tax expenses of the individual Group companies based on their applicable tax rates can be reconciled as follows:

	2015	2014
in CHF 000		
Profit before income taxes	37 880	13 336
Expected average Group tax rate	13.5 %	13.6 %
Income taxes at expected Group tax rate	5 115	1 807
Expenses not recognised for tax purposes/non-taxable revenues	3 044	-2 546
Use of previously unrecognised tax loss carry forwards	-19 791	-534
Effects on current income taxes for prior periods	440	57
Increase of allowances on deferred tax assets	7 509	1 172
Release of previous allowances against deferred income tax assets	-2 851	-3 419
Changes in tax rates	-588	16
Other effects	-1 800	1 373
Total reported income taxes	-8 922	-2 074
Effective tax rate	-23.6 %	-15.5 %

Expected average Group tax rates take account of the tax rates applying to individual entities on a weighted basis. The expected average Group tax rate for 2015 was virtually unchanged on its level for 2014.

Changes to deferred income taxes were as follows:

<i>Changes to deferred tax assets and liabilities</i>	Deferred tax assets	Deferred tax liabilities	Net assets (+)/ Net liabilities (-)
in CHF 000			
Balance at December 31, 2013	26 541	-48 333	-21 792
Deferred taxes recorded in the income statement	-4 384	10 912	6 528
Deferred taxes recorded in other comprehensive income	4 563	0	4 563
Changes in consolidation scope	0	1 571	1 571
Reclassification to disposal group	-2 077	3 989	1 912
Currency translation differences	-307	-526	-833
Balance at December 31, 2014	24 336	-32 387	-8 051
Deferred taxes recorded in the income statement	13 207	619	13 826
Deferred taxes recorded in other comprehensive income	0	3 262	3 262
Changes in consolidation scope	4 820	-7 758	-2 938
Currency translation differences	-1 508	2 126	618
Balance at December 31, 2015	40 855	-34 138	6 717

The deferred taxes recorded in other comprehensive income relate to continuing operations.

The composition of deferred income tax assets and liabilities is as follows:

<i>Deferred tax assets by source of difference</i>	2015	2014
in CHF 000		
Current assets	153	401
Property, plant and equipment	1 356	471
Goodwill, software and other intangible assets	18 165	7 383
Pension liabilities	4 195	0
Liabilities and provisions	737	1 721
Tax loss carry forwards	16 752	14 360
Total	41 358	24 336
<i>Deferred tax liabilities by source of difference</i>		
Current assets	-1 556	-160
Property, plant and equipment	-8 805	-4 987
Goodwill, software and other intangible assets	-19 304	-20 053
Pension asset	-2 762	-6 739
Liabilities and provisions	-2 214	-448
Total	-34 641	-32 387
<i>Reported in the balance sheet</i>		
Deferred income tax assets	40 855	24 336
Deferred income tax liabilities	-34 138	-32 387
Total deferred income tax liabilities, net	6 717	-8 051

Tax loss carry forwards amounted to CHF 247.0 million in 2015, excluding the disposal group (CHF 177.6 million in 2014). In 2015, CHF 53.9 million deferred tax assets on tax loss carry forwards of CHF 188.4 million were not recognized, since it was not probable that they could be utilised. In 2014, CHF 40.8 million of the CHF 132.8 million tax loss carry forwards were not recognised as a deferred tax asset for the same reason. These tax loss carry forwards either cannot expire or have expiration dates more than 5 years in the future.

There are temporary differences amounting to CHF 95.4 million excluding the disposal group (CHF 202.4 million in 2014) for which no deferred tax assets were capitalised.

15 EARNINGS PER SHARE

Earnings per share are calculated by dividing the net profit attributable to shareholders of Valora Holding AG by the weighted average number of shares outstanding.

	2015	2014
in CHF 000		
Net profit from continuing operations	46 802	15 410
Interest attributable to perpetual hybrid bond holders	-4 800	-4 800
Net profit from continuing operations attributable to Valora Holding AG shareholders	42 002	10 610
Net loss from discontinued operations	-76 396	-8 341
(Net loss)/net profit from continuing and discontinued operations attributable to Valora Holding AG shareholders	-34 394	2 269
Average number of shares outstanding	3 358 171	3 388 061
Earnings per share from continuing operations (in CHF)	12.51	3.13
Earnings per share from continuing and discontinued operations (in CHF)	-10.24	0.67

There were no dilutive effects in 2015 or 2014.

16 CASH AND CASH EQUIVALENTS

	2015	2014
in CHF 000		
Petty cash and on demand deposits	116 308	129 047
Total cash and cash equivalents	116 308	129 047
thereof restricted cash	3 009	3 341

17 TRADE ACCOUNTS RECEIVABLE

	2015	2014
in CHF 000		
Trade accounts receivable, gross	61 934	40 843
Allowance for bad and doubtful debts	-5 656	-7 105
Total trade accounts receivable, net	56 278	33 738

Allowances for trade accounts receivable are shown in the table below:

	2015	2014
in CHF 000		
Position at January 1	7 105	5 233
Consolidation scope disposals	0	-172
Increase in allowance charged to income statement	2 581	2 708
Release of allowances credited to income statement	-2 863	-240
Reclass to disposal group	0	-261
Allowances used	-778	-128
Foreign exchange differences	-389	-35
Position at December 31	5 656	7 105

The year-end composition, by age, of overdue trade accounts receivable which have not been subjected to allowance is as follows:

	2015	2014
in CHF 000		
Up to 10 days overdue	2 362	2 125
More than 10 days, but less than one month overdue	1 066	1 087
More than one month, but less than two months overdue	60	1 430
More than two months, but less than four months overdue	131	114
More than four months overdue	671	198

The breakdown of trade accounts receivable by currency is as follows:

	2015	2014
in CHF 000		
CHF	45 224	22 341
EUR	11 054	11 397
Total trade accounts receivable, net	56 278	33 738

18 INVENTORIES

	2015	2014
in CHF 000		
Merchandise	142 666	136 257
Finished and semi-finished goods	2 916	3 210
Other inventories	2 190	2 909
Total inventories	147 772	142 376

In 2015, write-downs of CHF 6.2 million were charged to cost of goods (CHF 6.2 million in 2014).

19 OTHER CURRENT RECEIVABLES

	2015	2014
in CHF 000		
Value-added tax and other taxes	2 843	2 924
Prepaid expenses and accrued income	17 935	16 867
Short-term receivables from finance leases	621	621
Miscellaneous receivables	27 021	31 963
Total other current receivables	48 420	52 375

The miscellaneous receivables above comprise mainly cost reimbursement receivables and payments receivable from social security agencies and insurers. Additional information relating to short-term receivables from finance leases can be found in note 23.

¹⁾ The values shown in the lines consolidation scope disposals and transfers to disposal group are those applicable at January 1, 2014. Accordingly, all the other changes shown for 2014 and 2015 in the table above relate to continuing operations.

Property, plant and equipment includes machinery and equipment held on finance leases with a carrying amount of CHF 1.0 million (CHF 1.6 million in 2014). The impairments recorded against machinery and equipment predominantly relate in both years to outlet infrastructure.

21 INVESTMENT PROPERTY

The acquisition costs and carrying amounts for the investment property portfolio were as follows:

<i>Investment property</i>	2015	2014
in CHF 000		
<i>At cost</i>		
Balance at January 1	4 156	4 156
Additions	0	0
Disposals	-3 333	0

Additions	-37	-67
Disposals	412	0
Foreign exchange differences	0	0
Balance at December 31	-201	-576
Total net carrying amount	622	3 580

On July 1, 2015, an investment property in Interlaken was sold for CHF 2963 thousand, generating a book gain of CHF 42 thousand.

The estimated fair value of the investment properties is based on revenue-value calculations (see note 35) and amounts to CHF 0.6 million (CHF 3.8 million in 2014). The rental income from the investment properties was CHF 0.2 million (CHF 0.3 million in 2014) and the associated maintenance and operational costs were CHF 0.1 million (CHF 0.1 million in 2014).

at December 31, 2014	362 554	48 657	51 655	8 889	471 755
at December 31, 2015	417 141	46 207	46 336	3 488	513 172

¹⁾ The values shown in the lines consolidation scope disposals and transfers to disposal group are those applicable at January 1, 2014. Accordingly, all other changes shown for 2014 and 2015 in the table above relate to continuing operations.

CHF 16662 thousand of the impairment charges for 2014 relate to acquired supply rights to Valora Retail.

The intangible assets include software operated under a finance lease contract with a carrying amount of CHF 0.5 million (CHF 1.5 million in 2014).

Intangible assets with indefinite useful life. The intangible assets with indefinite useful life are the Ditsch brand (CHF 22.3 million) and the Brezelkönig brand (CHF 23.9 million). Valora's brand rights were tested as part of the impairment tests for the cash generating units Ditsch and Brezelkönig. These are based on the revenues projected in the relevant three-year business plans. Thereafter an annual revenue growth of 1.0% (1.0% in 2014) has been assumed. The pre-tax discount rates applied are 7.7% for Ditsch and 5.6% for Brezelkönig (6.7% and 5.5%, respectively, in 2014).

Software and intangible assets with finite useful life. Software and intangible assets with finite useful life include CHF 15.1 million (CHF 12.2 million in 2014) for software and CHF 31.2 million (CHF 39.4 million in 2014) for intangible assets with finite useful life, of which CHF 23.3 million (CHF 29.5 million in 2014) relate to customer relationships of Ditsch/Brezelkönig.

Goodwill impairment test. Goodwill is assigned to the Group's cash-generating units. It is initially allocated to business segments and then, within these, to geographically related markets. The composition of the goodwill positions is as follows:

	Segment	Year acquired	2015	2014
in CHF 000				
Valora Retail Switzerland	Retail	2002–2015	91 292	12 774
Valora Retail Germany	Retail	2008–2012	87 740	97 417
Valora Retail Austria (Schmelzer-Bettenhausen)	Retail	2012	0	1 321
Ditsch Germany and Brezelkönig Switzerland	Ditsch/ Brezelkönig	2012	238 109	251 042
Total carrying amount at December 31			417 141	362 554

Impairment tests are carried out at least once a year or in case of evidence of a possible impairment. Each unit's recoverable amount is determined on the basis of its value in use and then compared to its carrying amount. An impairment adjustment will be made only if the carrying amount of the cash-generating unit exceeds its value in use. Valuation is carried out on the basis of projected future free cash flows from cash-generating units to which goodwill has been allocated, using the discounted cash flow (DCF) method. These projected cash flows are discounted at a rate equal to the pre-tax weighted average cost of capital.

These projected future cash flows are taken from the business plans of the companies concerned for the next three years based on management projections. The following key assumptions are applied:

Valora Retail Switzerland. For the three years covered by the business plan, revenues are expected to remain stable and margins are expected to increase slightly.

Valora Retail Germany. Revenue growth over the planning period is expected to average a good 3.0% and margins are expected to increase.

Ditsch/Brezelkönig. Revenue growth over the planning period is expected to average a good 5.0% and margins are expected to remain stable.

Cash flows after this three-year period are modelled by using a residual value based on projections for the third planning year and assume zero growth thereafter, except in the case of Ditsch/Brezelkönig, whose subsequent growth rates are assumed to be 1.0% (1.0% in 2014). The discount rates applied are based on data observed in Swiss financial markets which are then adjusted to reflect currency and country-specific risks.

The discount rates used (pre tax) are as follows:

	Currency	2015	2014
Valora Retail Switzerland	CHF	5.5%	5.9%
Valora Retail Germany	EUR	7.2%	6.7%
Valora Retail Austria	EUR	7.6%	6.9%
Ditsch/Brezelkönig (Germany/Switzerland)	EUR	5.9%	6.7%

In 2015, because the sales and revenues projected for Valora Retail Austria failed to meet their expected targets, the goodwill for this business area was written down to zero, resulting in an impairment charge of CHF 1189 thousand.

No impairment charges relating to continuing operations were recorded in 2014.

Sensitivities. For all Goodwill positions, the impairment tests for 2015 showed that even in the event of a possible increase in the discount rate by 1.5 percentage points or sales growth rates being zero, all values in use would exceed the relevant carrying amounts.

23 RECEIVABLES FROM RENTAL LEASES AND LEASE AGREEMENTS

<i>Receivables from rental leases</i>	2015	2014

Within 4–5 years	426	480
After more than 5 years	1 041	1 309
Total present value of future minimum finance lease revenues	3 656	4 050

The finance leases cover extensions to the former headquarters in Bern made during Valora's tenancy, which the new tenant is using.

24 FINANCIAL ASSETS

	2015	2014
in CHF 000		
Loans	5 812	740
Receivables from finance leases	3 035	3 429
Other long-term receivables	32 739	13 239
Financial assets available for sale	673	667
Total financial assets	42 259	18 075

The increase in loans is essentially attributable to the Naville acquisition. Other long-term receivables include the contingent consideration and the warranty receivable arising from the sale of the Trade division.

Note 23 provides further information on receivables from finance leases.

The financial assets available for sale include CHF 673 thousand (CHF 638 thousand in 2014) of unlisted securities for which there is no active market and about which insufficient information is available to determine a fair value. These items are therefore carried at cost less impairment, if there were any.

Other long-term receivables relate to the earn-out provisions of the Trade division sale agreement, Valora's contingent guarantee entitlement associated therewith and the outstanding balance of the purchase price due to Valora from its sale of the MuttENZ facility in 2012, which has been offset against the amounts payable by Valora over the next seven years to 2022 under the usufruct agreement which grants Valora occupancy of the facility during that period and is secured by a lien on the property.

25 INVESTMENT IN JOINT VENTURES

Investments in joint ventures comprise Valora's 50% stake in Emere AG. The carrying amount of these shares amounts to CHF 50 thousand (CHF 50 thousand in 2014). There is no impact on the income statement or the statement of comprehensive income.

26 SHORT-TERM FINANCIAL DEBT AND OTHER LONG-TERM LIABILITIES

<i>Short-term financial debt</i>	2015	2014
in CHF 000		
Current bank debt	226	37
Current portion of finance lease obligations	1 425	1 376
Total short-term financial debt	1 651	1 413

<i>Other non-current liabilities</i>	2015	2014
in CHF 000		
Bank loans	-697	-896
Bonded-loan issue	162 050	179 832
Bonds	199 874	199 816
Long-term finance lease obligations	689	1 836
Other long-term liabilities	7 076	3 842
Total other non-current liabilities	368 992	384 430

Note 32 provides further information on commitments arising from finance leases.

The CHF 200 million syndicated loan facility is not currently being utilised. The change in carrying amount of the bonded-loan issue is essentially due to the foreign-exchange gain of CHF 17 925 resulting from the conversion of its EUR value into CHF.

The other long-term liabilities consist of financial debt amounting to CHF 4 492 thousand (CHF 673 thousand in 2014) and other liabilities of CHF 2 584 thousand (CHF 31 316 thousand in 2014).

<i>Bonds</i>	Nominal value	2015 Carrying amount	2014 Carrying amount
in CHF 000			
2.50 % bond 2012–2018	200 000	199 874	199 816

Maturities at year end are as follows

	2015	2014
in CHF 000		
Within one year	1 651	1 413
Within 1–2 years	–110	346
Within 2–3 years	199 648	291
Within 3–4 years	162 378	199 648
Within 4–5 years	0	180 303
After more than 5 years	4 492	673
Total financial debt	368 059	382 674
Current portion of long-term financial debt	–1 651	–1 413
Total long-term financial debt	366 408	381 261

The interest rates paid ranged between 1.0% and 4.0% (vs 2.5% and 4.0% in 2014). The weighted average interest rate on Valora's financial debt was 3.3% (3.6% in 2014). The currency composition of the Group's long-term financial debt is as follows:

	2015	2014
in CHF 000		
CHF	204 358	201 386
EUR	162 050	179 875
Total long-term financial debt	366 408	381 261
Other long-term liabilities	2 584	3 169
Total other non-current liabilities	368 992	384 430

27 TRADE ACCOUNTS PAYABLE

The currency composition of the Group's trade accounts payable is as follows:

	2015	2014
in CHF 000		
CHF	109 434	91 189
EUR	34 425	35 594
SEK	53	0
Other	50	49
Total trade accounts payable	143 962	126 832

28 OTHER CURRENT LIABILITIES

	2015	2014
in CHF 000		
Value-added tax and other taxes	3 680	1 345
Social security contributions payable	1 065	1 939
Accruals for overtime, unused vacation and variable elements of remuneration	10 586	7 577
Pension cost payable	1 735	2 046
Accrued expenses	61 480	28 400
Other current liabilities	37 643	29 911
Total other current liabilities	116 189	71 218

The increase in accrued expenses is due to the Naville acquisition. Accrued expenses essentially comprise press-expense accruals and interest expense accruals. Other current liabilities principally relate to liabilities for rental and rental-related costs and liabilities arising from investments in non-current assets and intangible assets.

29 PROVISIONS

	Guarantees	Litigation	Total
in CHF 000			
Balance at December 31, 2013	0	406	406
Foreign exchange differences	0	-8	-8
Balance at December 31, 2014	0	398	398
Reclassifications	7 053	0	7 053
Creations	4 000	0	4 000
Foreign exchange differences	0	-39	-39
Balance at December 31, 2015	11 053	359	11 412
Current provisions	0	0	0
Long-term provisions	11 053	359	11 412
Total provisions	11 053	359	11 412

Guarantees: The provision of CHF 11 053 thousand was established in connection with the contractual arrangements for the sale of the Trade division (CHF 0 thousand in 2014).

Litigation: Provisions for pending litigation amounted to CHF 359 thousand at December 31, 2015 (CHF 398 thousand in 2014).

30 RETIREMENT BENEFIT LIABILITIES

Current legislation requires most employees to be covered by pension schemes financed by contributions from the Valora Group and its employees. These schemes take the form of state and employer-sponsored plans, contracts with private insurers and independent foundations or welfare plans. While the benefits paid by these schemes vary according to the legislative provisions and economic circumstances of the countries in which they are established, they are generally based on years of service and average remuneration of the employees and cover the risks of old age, death and disability in accordance with applicable local occupational pension plan law.

The majority of Valora employees in Switzerland are covered by Valora's independent pension fund against the risks associated with old age, death and disability. The regular contributions paid into this fund by the employer include age-based risk premiums of 1.0–3.0% of insured salary and savings contributions of 4.0–11.0% of insured salary. These amounts are credited to the individual employee's retirement savings. The benefits payable by the Valora pension fund are governed by its rules and regulations, with certain minimum benefits being required by law. The regular retirement age is 65 for men and 64 for women. On or after their 58th birthday, Valora employees are entitled to take early retirement. For those electing to do this, the annuity rate applied to their accumulated retirement savings is reduced to reflect the anticipated increase in the period during which they will draw a pension. The amount of the pension paid to each retired employee is based on the annuity rate applied to his or her individual accumulated retirement savings. For male employees retiring at 65 and female employees retiring at 64, this annuity rate is currently set at 6.60% (6.70% in 2014). Between now and 2020 this annuity rate will be reduced by 0.10% per annum, to reach 6.20% in 2020. An employee's accumulated retirement savings comprise the savings contributions made by the employer and the employee and the interest payments made in respect thereof. The interest rate is fixed by the board of trustees of the Valora pension fund each year. The Valora pension fund has the legal status of a foundation. Management of the foundation is the responsibility of a board of trustees comprising equal numbers of representatives of both the employer and the employees. The duties of the board of trustees are laid down by the Swiss Federal Law on Occupational Old-age, Survivors' and Invalidity Insurance and the rules and regulations of the Valora pension fund. Temporary shortfalls in the pension fund's assets versus its projected obligations are permitted under Swiss law. In order to restore any such shortfall within a reasonable period of time, the board of trustees is required to put recovery measures into effect. In the event of a significant shortfall, additional contributions by the employer and the employees could be required under Swiss law.

The day-to-day business of the pension fund is carried out by the management unit under the supervision of the board of trustees. The management unit provides the board of trustees with periodic reports on the course of business. All actuarial risks associated with pension fund are borne by the foundation. These risks comprise both demographic elements (particularly relating to changes in life expectancy) and financial elements (particularly relating to changes in the discount rate, salary progression and the returns generated by the plan assets). The supervisory board reviews these risks on a regular basis. To that end, an actuarial assessment is carried out once a year in accordance with the requirements of the relevant Swiss law. This assessment is not carried out according to the projected-unit-credit method. The board of trustees is responsible for the asset allocation of the fund. Where necessary, the board of trustees revises the investment strategy, particularly in the event of significant changes in market conditions or the age structure of the plan participants. The investment strategy takes account of the foundation's risk-bearing capacity and its benefit obligations under the plan. The investment strategy is formulated as an asset structure which the foundation aims to achieve over the long term. The objective is to achieve congruence between the plan's assets and its projected obligations over the medium and long term.

The most recent actuarial calculation was obtained of December 31, 2015. The assumptions used were based on the economic circumstances prevailing in the countries in which the plans operate (currently only Switzerland). The plans' assets are invested according to the guidelines laid down by local legislation. Valora pays its contributions in accordance with the various plans' rules.

Other employees in Germany and Austria are also covered by a number of smaller, unfunded pension plans.

Plan liabilities and assets

	2015	2014
<i>in CHF 000</i>		
Present value of benefit obligation at January 1	551 337	560 836
Current service cost	13 008	13 099
Contributions by plan participants	6 161	6 626
Interest cost	5 707	11 534
Plan curtailments, settlements and amendments	-18 123	-5 963
Consolidation scope disposals	0	-29 941
Consolidation scope additions	73 019	0
Benefits paid	-39 313	-6 041
Transfers to disposal group	0	-53 880
Actuarial loss on benefit obligation	8 963	56 039
Exchange rate gains	-38	-972
Present value of benefit obligation at December 31	600 721	551 337
Plan assets at fair value at January 1	580 301	604 283
Interest income	5 897	12 190
Employer contributions	8 771	9 401
Contributions by plan participants	6 161	6 626
Plan curtailments, settlements and amendments	-15 526	-5 305
Consolidation scope disposals	0	-26 746
Consolidation scope additions	61 817	0
Benefits paid	-39 261	-5 509
Transfers to disposal group	0	-44 352
Actuarial (loss)/gain on plan assets	-11 271	30 483
Other plan costs	-823	-770
Plan assets at fair value at December 31	596 066	580 301

In 2015, changes to financial assumptions resulted in an actuarial loss on the plan's projected obligations. The actuarial loss on plan assets resulted from investment returns which were lower than interest income credited.

The Group expects to make employer's contributions of CHF 8.3 million to its funded plans in 2016.

The surplus on funded plans fell by CHF 33.7 million in 2015 (after decreasing by CHF 26.0 million in 2014) and resulted in a net pension liability of CHF 4655 thousand, principally as a result of a reduction in the discount rate.

<i>Balance sheet data</i>	2015	2014
in CHF 000		
Present value of funded benefit obligations	-600 367	-550 937
Plan assets at fair value	596 066	580 301
(Deficit)/surplus on funded plans	-4 301	29 364
Present value of unfunded pension liabilities	-354	-400
Total net pension position	-4 655	28 964
of which capitalised as net pension asset	13 633	30 099
of which capitalised as long-term pension	-18 288	-1 135

The weighted average duration of the present value of the pension plan's liabilities is 14.1 years (14.5 years in 2014).

The net pension asset evolved as follows:

	2015	2014
in CHF 000		
January 1	28 964	43 447
Transfers to disposal group	0	9 528
Consolidation scope disposals	0	3 195
Consolidation scope additions	-11 202	0
Net pension expense	-11 044	-12 555
Employer contributions	8 824	9 933
Actuarial losses	-20 235	-25 556
Exchange rate gains	38	972
December 31	-4 655	28 964

<i>Income statement</i>	2015	2014
in CHF 000		
Current service cost to employer	-13 008	-13 099
Interest cost	-5 707	-11 534
Plan curtailments, settlements and amendments	2 597	658
Interest income	5 897	12 190
Other pension costs	-823	-770
Net pension cost for period	-11 044	-12 555

The 2015 income from plan curtailments of CHF 2597 thousand is attributable to the transfer of Valora-operated outlets to agent managers (CHF 658 thousand in 2014).

<i>Actuarial gains / losses</i>	2015	2014
in CHF 000		
Changes to financial assumptions	-21 156	-66 297
Experience-based adjustment to pension obligations	12 192	10 258
(Loss) / gain on plan assets (excluding interest income based on discount rate)	-11 271	30 483
Actuarial losses	-20 235	-25 556

<i>Actuarial gains / losses recorded in other comprehensive income</i>	2015	2014
in CHF 000		
January 1	-71 562	-51 217
Actuarial losses	-21 125	-25 504
Deferred taxes	4 232	5 159
December 31	-88 455	-71 562

<i>Key actuarial assumptions</i>	2015	2014
Discount rate (Switzerland only)	0.70 %	1.00 %
Expected rate of increase in future salary levels (Switzerland only)	1.00 %	1.00 %

The calculations for Switzerland were based on the BVG 2010 (generation table).

<i>Sensitivity analysis</i>	2015	2014
Discount rate (+0.25 %)	-19 000	-17 566
Discount rate (-0.25 %)	17 960	18 582
Salary progression (+0.50 %)	1 491	1 814
Salary progression (-0.50 %)	-1 581	-1 714

Only one assumption is changed in each analysis, with the others remaining unchanged.

<i>Asset allocation</i>	2015	2014
Cash and cash equivalents	4.80 %	6.80 %
Fixed income	31.40 %	32.50 %
Equity	30.60 %	27.20 %
Real estate	30.80 %	31.20 %
Other	2.40 %	2.30 %
Total	100.00 %	100.00 %

With the exception of the real-estate assets, all assets are quoted.

The amount of the effective return from plan assets was CHF –6.2 million (CHF 41.9 million in 2014). The effective return generated in 2015 was –1.1 % (6.9% in 2014). The pension plans hold no securities issued by Valora Holding AG and do not let any significant portion of their real estate to the Valora Group.

31 SHARE-BASED PAYMENTS

Valora operates the following share-based remuneration plans for its Board of Directors, management and staff:

LTP share-based programme for the Board of Directors and Group Executive Management. The Board of Directors has decided to discontinue the current Long Term Plan (LTP) applicable to members of the Board and Group Executive Management. For Board members, the LTP was terminated at the 2014 General Meeting.

In the case of Group Executive Management, the Board decided to phase out the existing LTP on October 31, 2015 and to replace it with a new share-based management programme, the Share Participation Programme (SPP). All LTP grants outstanding on October 31, 2015 were terminated and the shares were repurchased.

Share-based programme for the Board of Directors. Under the remuneration regulations for the Board of Directors, 20% of the overall remuneration paid to individual Board members is in the form of blocked registered shares. Where appropriate, the Board may decide to increase or decrease the proportion of overall remuneration Board members receive as blocked shares. The shares are subject to a general lock-up period of three years. During the lock-up period, the shares remain in a Valora custody account. During this time, Board members are not permitted to sell, pledge or otherwise transfer their shares. Once the lock-up period has ended, Board members have free access to their shares.

In 2015, an allocation amounting to 20% of total remuneration was granted to the members of the Board of Directors in the quarter following the General Meeting.

SPP share-based programme for Group Executive Management. For the members of Group Executive Management, a new share-based management incentive plan, the Share Participation Programme (SPP), came into effect on November 1, 2015. Under the SPP, participants receive part of their contractual remuneration in the form of Valora Holding AG shares. Accordingly, they are not required to make any payment, in cash or other assets, for the shares allocated to them. While SPP participants are granted all the ownership rights associated with these shares, they are subject to certain restrictions during a specified lock-up period. 50% of the shares allocated to SPP participants as part of their remuneration in each calendar year are granted on March 31 of that year, with the remaining 50% being granted on September 30. The Swiss franc value of the shares to be granted to the individual participants is specified in their employment con-

tracts. The number of shares ultimately allocated is determined on the basis of the volume-weighted average trading price of the shares during a specified reference period, minus a discount to compensate for the lock-up period. The reference period comprises the 10 consecutive trading days ending on March 31 of the year in which the allocations are made. The shares granted under the SPP are blocked for a period of three years commencing on the grant date, but are not subject to any other performance hurdles. The current market value of the shares on the grant date is charged to the income statement as a personnel expense.

ISPP share programme for specific executive-level employees. In 2012, an equity settled programme was established under which certain executive-level employees (other than members of Group Executive Management) can receive a portion of their total remuneration in the form of Valora shares. On April 1, 2012 shares were allocated under this International Share Participation Programme (ISPP). They were either subject to a first vesting period until March 31, 2014 (for the first retention period) or a second vesting period until March 31, 2016 (for the second retention period), after which ownership is transferred to the plan participants. The personnel expenses relating to the ISPP are recognised over the length of the vesting periods. In 2015, it amounted to CHF 0.1 million (CHF 0.1 million in 2014).

Employee share ownership plan. Provided specific criteria are fulfilled and based on their function or management position, employees in Switzerland (other than members of Group Executive Management) are entitled to acquire shares of Valora Holding AG at the beginning of each year on preferential terms. Shares may be purchased at 60% of the average market price for the shares during the previous November. Shares so acquired enjoy all usual shareholder rights, but may not be sold during the 3 years immediately following purchase. The proceeds of these share sales to employees are credited directly to equity.

Personnel costs for share-based remuneration plans for employees and the members of the Board of Directors

	2015	2014
in CHF 000		
Expenses related to Valora Group share-based plans for employees and management (equity settled)	883	575
Expenses related to Valora Group share-based plans for employees and management (cash settled)	0	-61
Total share-based plan expenses charged to income	883	514

32 CONTINGENT LIABILITIES, COMMITMENTS FROM LEASE AND OTHER CONTRACTS

<i>Contingent liabilities</i>	2015	2014
in CHF 000		
Other contingent liabilities	3 929	8 000

<i>Unrecognised commitments from operating leases and other contracts</i>	2015	2014
in CHF 000		
Long-term rental commitments	693 824	639 925
Other operating lease commitments	4 465	2 892
Future commitments from other contracts	57 580	74 336
Total commitments	755 869	717 153

<i>Long-term rental commitments</i>	2015	2014
in CHF 000		
Minimum rental expense in period	127 860	132 920
Contingent rent expense in period	37 278	30 019
Total rental expense in period	165 138	162 939

<i>Leases maturity</i>	2015	2014
Within one year	142 423	126 954
Within 1–2 years	130 654	117 105
Within 2–3 years	119 334	102 623
Within 3–4 years	103 987	91 789
Within 4–5 years	86 868	77 461
After more than 5 years	110 558	123 993
Total long-term rental commitments	693 824	639 925

The majority of the long-term rental agreements serve to secure kiosk sites for the long term. Some of the rents under these agreements are linked to turnover.

<i>Other operating leases</i>	2015	2014
in CHF 000		
Total expenses for other operating leases in period	3 100	2 334

<i>Leases maturity</i>	2015	2014
Within one year	2 155	1 363
Within 1–2 years	1 549	919
Within 2–3 years	604	533
Within 3–4 years	147	77
Within 4–5 years	10	0
Total unrecognised commitments from other operating leases	4 465	2 892

The other unrecognised operating lease commitments principally relate to leased vehicles.

<i>Other contracts</i>	2015	2014
in CHF 000		
<i>Leases maturity</i>		
Within one year	26 366	30 189
Within 1–2 years	11 656	12 121
Within 2–3 years	11 135	11 834
Within 3–4 years	8 221	11 618
Within 4–5 years	202	8 574
Total unrecognised commitments from other contracts	57 580	74 336

The Group's unrecognised commitments from other contracts mostly relate to IT outsourcing agreements.

<i>Finance lease commitments</i>	2015	2014
in CHF 000		
Total payments (interest and amortisation) during reporting period	1 555	1 621
<i>Leases maturity</i>		
Within one year	1 461	1 449
Within 1–2 years	698	1 177
Within 2–3 years	0	698
Total finance lease commitments	2 159	3 324
Less future interest charges	-45	-112
Total finance lease obligation (present value)	2 114	3 212
Less current portion of finance lease obligation (see note 26)	-1 425	-1 376
Long-term finance lease obligation (see note 26)	689	1 836

<i>Present value of future minimum lease payments</i>	2015	2014
in CHF 000		
Within one year	1 425	1 376
Within 1–2 years	689	1 145
Within 2–3 years	0	691
Total present value of future minimum finance lease payments	2 114	3 212

The finance lease obligations relate both to leased retail shop equipment, computer hardware and software.

33 RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

The international scale of its business operations and its financing structure both expose the Valora Group to a variety of financial risks. These not only include market risks such as foreign exchange and interest rate risk, but also encompass liquidity and credit risks. Valora's financial risk management activities aim to limit these risks. Valora's fundamental financial policies are set by Group Executive Management and overseen by the Board of Directors. Responsibility for implementing Group financial policy and for financial risk management lies with the central Corporate Treasury.

In order to visualise market risks, sensitivity analyses are conducted which show the effects which hypothetical changes in relevant risk variables would have on pre-tax net income and other comprehensive income. These potential effects are determined by applying the assumed changes in risk variables to the valuation of the Group's positions in financial instruments. The interest rate scenarios used show differences between the current level of interest rates at balance sheet date and those assumed to prevail at the end of the following year. The hypothetical changes in exchange rates are based on 1-year volatility levels prevailing at the balance sheet date.

Exchange rate risks. Transaction risks represent the risk that the recognised assets and liabilities completed in foreign currencies will fluctuate as a result of changes in the exchange rate. For Valora, transaction risks arise as a result of its purchasing goods and services from suppliers abroad and on intra-Group transactions. Most Group companies transact the majority of their business in their functional currency. In order to limit transaction risks, currency derivatives are used from time to time. Currency translation risks, on the other hand, arise when the balance sheets of subsidiaries outside Switzerland are converted into Swiss francs for consolidation.

The table below shows the main effects on pre-tax earnings and other comprehensive income which would result from hypothetical changes in key exchange rates.

<i>FX rate sensitivity</i>	Hypothetical change (in percent) 2015	Impact on 2015 pre-tax earnings	Impact on 2015 other comprehensive income	Hypothetical change (in percent) 2014	Impact on 2014 pre-tax earnings	Impact on 2014 other comprehensive income
in CHF 000						
CHF / DKK	+/- 20.0 %	+/- 0	+/- 0	+/- 2.0 %	+/- 292	+/- 0
CHF / EUR	+/- 20.0 %	+/- 8 592	+/- 33 263	+/- 2.0 %	+/- 261	+/- 3 789
CHF / NOK	+/- 20.0 %	+/- 0	+/- 0	+/- 8.0 %	+/- 1 054	+/- 0
CHF / SEK	+/- 20.0 %	+/- 13	+/- 0	+/- 6.6 %	+/- 4 997	+/- 0

Net investments in subsidiaries outside Switzerland are also analysed periodically and the risks are assessed in the light of the volatility of the currencies concerned. These analyses show that the currency translation risk is modest compared to available equity. Translation risks are not hedged.

Interest rate risks. Cash and cash equivalents are the Group's principal interest-bearing assets. Since the interest rates applicable to these assets are variable, the interest income derived from them are directly affected by market interest rates. Under normal circumstances, the Group's principal interest rate risk relates to the interest paid on its financial liabilities. Floating-rate financial liabilities expose the Group to interest-rate cash-flow risks. Financial liabilities with fixed interest rates, on the other hand, expose the Group to the risk of shifts in the fair value of its liabilities. In order to achieve the target mix between fixed and floating interest rate exposure, interest rate hedging transactions are entered into where necessary. Interest-bearing liabilities essentially comprise the bond issued and the bonded-loan (see note 26).

In the sensitivity analysis of the interest rate risk, impacts arise only on positions with variable interest rates. The table below shows the principal changes in pre-tax earnings which would result from hypothetical shifts in the level of interest rates in the main currencies in which Valora operates.

Interest rate sensitivity

	Hypothetical change (in basis points) 2015	Impact on 2015 pre-tax earnings	Hypothetical change (in basis points) 2014	Impact on 2014 pre-tax earnings
in CHF 000				
CHF	+/- 5	+/- 26	+/- 5	+/- 26
EUR	+/- 4	+/- 13	+/- 3	+/- 15

Neither the table for 2015 nor the table for 2014 does include data for the interest rate swap position established to hedge the interest-rate risk on the bonded-loan (see Tools for hedging and risk management/applying of Hedge Accounting). Assuming a hypothetical change to the swap rate of the same maturity of +/- 94 basis points, the change in the value of this hedge, at December 31, 2015, would have impacted other comprehensive income by +/- CHF 2.3 million, whereas a hypothetical change to the swap rate of the same maturity of +/- 78 basis points, the change in the value of this hedge, at December 31, 2014, would have impacted other comprehensive income by +/- CHF 2.8 million.

Liquidity risks. Liquidity risk management aims to ensure that the Group is always able to meet its payment obligations in full and on time. The Valora Group continually monitors its liquidity position and uses cash pool structures to optimise it. Additional liquidity reserves in the form of credit lines and cash ensure that the Group remains both solvent and financially flexible.

The table below shows the nominal interest and principal repayments arising from the Group's financial obligations. It takes account of all instruments in which the Group held positions at December 31 of the two years shown (with the exception of the disposal group). Interest amounts payable on floating rate instruments have been determined based on conditions existing at year end.

	up to 1 month	from 1 to 3 months	from 3 months to 1 year	from 1 to 5 years	more than 5 years
in CHF 000					
At December 31, 2015

Trade accounts payable	34 210	91 976	646	0	0
Other short-term financial liabilities (financial instruments only)	8 577	16 791	24 292	0	0
Long-term financial liabilities	0	5 020	5 300	414 475	673
Total	42 971	113 832	35 543	414 475	673

In order to manage its liquidity in an optimal way, the Valora Group has various credit facilities in place, both at fixed and floating rates of interests, which have not been fully drawn down.

Credit risks. Credit risks arise when a counterparty is not in a position to meet its obligations as agreed. Valora constantly reviews its accounts receivable and manages them so as to avoid significant credit or concentration risks. At year end 2015 and year end 2014, the Valora Group had no accounts receivable from individual customers which accounted for more than 7% of its total accounts receivable.

The Valora Group conducts its financial transactions with a selected number of first-class financial institutions. Specific situations may require subsidiaries to transact business with other banks. The establishment and discontinuation of banking relationships is subject to approval by the Group's corporate treasury, which regularly reviews all banking relationships on the basis of external ratings and sets exposure limits for all counterparties. The maximum default risk of CHF 259 million on the Group's financial assets (CHF 228 million in 2014) is equal to the carrying amount of these instruments (see note 34).

The table below shows the Group's demand deposits and fixed term deposits with maturities of 3 months or less by rating of the banking counterparties with whom they are placed. The table uses Standard & Poor's ratings.

Sight deposits and fixed maturity deposits maturing in < 3 months placed with banks

	2015	2014
in CHF 000		
AAA and/or state guarantee (AAA states)	39	2 014
AA	6 064	670
A	53 875	81 051
BBB	24 602	19 370
No Rating	1 846	755
Total sight deposits and fixed maturity deposits maturing in < 3 months placed with banks ¹⁾	86 426	103 860

¹⁾ The remainder of the cash and cash equivalents position shown in the balance sheet relates to cash in hand (including cash in transit).

Tools for hedging and risk management. The Valora Group uses FX forward contracts to mitigate its foreign exchange risk. Interest rate swaps are also used to hedge interest rate risks. Exposure arising from existing asset and liability items, as well as that arising from future commitments, is centrally managed.

In order to hedge a substantial part of the purchase price of its acquisition of Naville (see Note 6), Valora entered into a rollover currency swap as per end of 2014 which qualified as a cash flow hedge. The hedge was executed with a negative replacement value of CHF 9.4 million. On February 27, 2015, the acquisition date, this was offset against the purchase price paid.

In order to hedge the interest payments on its bonded loan, which has a nominal value of EUR 72 million, Valora entered into an interest rate swap on October 30, 2013 which qualified as a cash flow hedge. The fair value of the swap on December 31, 2015 was CHF 3.4 million (CHF 4.0 million in 2014), which offsets the negative replacement value of the bonded loan and its change of fair value was allocated to other comprehensive income. The cash flows hedged by the swap will occur in the years from 2013 to 2019, during which time they will have an income-statement impact.

In order to hedge 50% of the interest expense on the bonds issued on February 1, 2012 (see note 26) Valora entered into a forward-starting interest rate swap in the first half of 2011. This swap has been designated as a cash flow hedge for the interest payments on the bond. This position was closed on February 1, 2012, with a negative replacement value of CHF 10.4 million. In 2015, CHF 1.7 million was reclassified from equity to financing expense (CHF 1.7 million in 2014). The cash flows hedged by this swap will occur in the years from 2012 to 2018, during which time they will have an income statement impact.

The table below shows both the notional amounts of the Group's positions in derivative financial instruments as well as their aggregate replacement values. The information, which is presented by instrument type, relates to valuations at balance sheet dates.

Notional amounts show the volume of the underlying transactions at the balance sheet dates. They do not contain any information about the market risk these positions involve. The replacement value of these positions has been determined by valuations provided by the counterparty, market prices at December 31, 2014 and 2015 or through standard pricing model valuations using market data.

<i>Derivative financial instruments</i>	2015 Contract value	2014 Contract value	2015 Replacement value	2014 Replacement value

Within 4 – 5 years	0	86 616
After more than 5 years	0	0
Total contract value of derivative financial instruments	104 016	207 472

Capital management. The overarching objective of the Valora Group's capital management is to achieve a strong credit rating and a good level of equity cover. Achieving those goals helps to support the Group's business activities and to maximise its value to its shareholders.

The Valora Group manages its capital structure and modifies it in response to changes in economic circumstances. In order to maintain or adapt its capital structure, the Valora Group can elect to implement a number of measures, such as modifying the amount of dividends paid to shareholders, capital repayments to shareholders or the issuance of new shares.

The Group monitors its capital position by reference to its equity cover, which is calculated on the basis of the percentage of total assets represented by equity (including non-controlling interests). The Group's capital and equity cover are shown in the table below:

	2015	2014
in CHF 000		
Equity attributable to Valora Holding AG	505 988	629 590
Equity attributable to non-controlling interests	27	1 011
Total equity	506 015	630 601
Equity ratio	41.5 %	44.0 %

The Valora Group is not subject to any regulatory capital requirements of the type prevalent in the financial services industry. The Group's required minimum equity cover is stipulated in the financial covenants governing its bank lending agreements (see note 26).

Financial liabilities held for trading	FLHfT	3 394	4 065	3 394	4 065

The carrying amounts of all short-term financial instruments represent reasonable approximations of their fair value. Any discounting effects are immaterial. The fair value of the bond issue is equal to its nominal value multiplied by its market price on the balance sheet date. Details of the valuations applied to derivative financial instruments and financial assets available for sale are contained in notes 4, 24 and 33. The fair values of the other long-term interest-bearing financial instruments were determined by discounting their expected future cash flows using market interest rates.

35 FAIR VALUES

Hierarchy levels applied to fair values. All the fair values shown below are allocated to one of the following three hierarchy levels:

- Level 1: Prices are based on quotes in active markets for identical assets and liabilities;
- Level 2: Fair values are calculated on the basis of observable market parameters. For these purposes either quoted prices in non-active markets or unquoted prices are used. These fair values can also be derived indirectly from other prices;
- Level 3: Fair values are calculated on the basis of significant unobservable parameters and are thus based on estimates.

The tables below show the fair value of assets and liabilities by hierarchy level:

2015	Level 1	Level 2	Level 3	Total
in CHF 000				
<i>Measured at fair value</i>				
Assets				
Derivative financial assets	0	61	0	61
Contingent consideration	0	0	16 295	16 295
Assets from disposal group	0	0	5 655	5 655
Liabilities				
Derivative financial liabilities	0	3 394	0	3 394
Liabilities from disposal group	0	0	5 603	5 603
<i>Disclosed at fair value</i>				
Assets				
Investment property	0	0	505	505
Liabilities				
Bonds	205 300	0	0	205 300

2014	Level 1	Level 2	Level 3	Total
in CHF 000				
<i>Measured at fair value</i>				
Assets				
Derivative financial assets	0	883	0	883
Financial assets available for sale	29	0	0	29
Assets from disposal group	0	0	303 682	303 682
Liabilities				
Derivative financial liabilities	0	4 065	0	4 065
Liabilities from disposal group	0	0	172 809	172 809
<i>Disclosed at fair value</i>				
Assets				
Investment property	0	0	3 767	3 767
Liabilities				
Bonds	208 600	0	0	208 600

The fair values reported at hierarchy level 2 are calculated using valuation models based on observable market parameters such as interest rates, yield curves and foreign-exchange rates on the valuation date.

No assets or liabilities were transferred between hierarchy levels 1 and 2 in 2014 and 2015.

Hierarchy level 3 fair values. The table below shows the changes which occurred between the opening and closing balances for fair values at hierarchy level 3:

	2015	2014
in CHF 000		
Balance on January 1 (Liability)	0	-7 720
Additions	16 295	0
Fair value adjustment recorded in other income	0	7 640
Foreign exchange differences	0	80
Balance on December 31 (Asset)	16 295	0

Contingent consideration arrangements. The additions to hierarchy level 3 fair values in 2015 relate to the contingent consideration which forms part of the sale price of the Trade Division.

The fair value of this contingent consideration is based on the present value of the unit's projected cash flows. The principal non-observable parameters in this calculation are the projected operating results and the discount rate applied to them. Depending on the operating results achieved, the projected cash flows are expected to range between zero and a maximum of CHF 20.0 million. In the December 31, 2015 balance sheet, the present value of these projected cash flows was recorded at CHF 16.3 million.

The contingent consideration arrangements reported as of January 1, 2014 concerning hierarchy level 3 relate to Valora's acquisitions of Convenience Concept and Delvita/Salty Snacks.

Based on a reassessment of the underlying parameters relating to projected revenues and discount rate, the liability relating to the Convenience Concept acquisition was fully derecognised during 2014.

Similarly, the fair value of the contingent consideration relating to the Delvita and Salty Snacks acquisition, which was based on projected payments by Valora which would fall due in the event of specific milestones being reached, was also reassessed and fully derecognised during 2014.

36 TRANSACTIONS AND BALANCES OUTSTANDING WITH RELATED PARTIES

The consolidated financial statements encompass Valora Holding AG as the ultimate parent company along with all subsidiaries it directly or indirectly controls, as set out in note 39.

Transactions. Business was transacted with related individuals and companies as follows:

<i>Goods and services sold to related parties</i>	2015	2014
in CHF 000		
<i>Goods sold to</i>		
Other related parties	218	3 462
<i>Services to</i>		
Associates	337	1 663
Other related parties	169	168
Total goods and services sold	724	5 293

<i>Goods and services purchased from related parties</i>	2015	2014
in CHF 000		
<i>Goods purchased from</i>		
Other related parties	2 993	3 354
<i>Services purchased from</i>		
Associates	399	1 427
Other related parties	474	493
Total goods and services purchased	3 866	5 274

Management and Board remuneration. Remuneration paid to management and the Board of Directors includes all expenses shown in the consolidated financial statements directly relating to members of the Group Executive Committee and the Board of Directors.

<i>Management and Board remuneration</i>	2015	2014
in CHF 000		
Salaries and other short-term benefits	5 196	5 469
Post-employment benefits	315	324
Long-term plan and share-based payments	2 051	1 916
Total Management and Board remuneration	7 562	7 709

Details of the remuneration paid to the Board of Directors and Group Executive Management, as well as details of their holdings of Valora Holding AG shares and of the shares held by significant shareholders (as required by Articles 663c of the Swiss Code of Obligations and VegÜV), can be found in the financial statements of Valora Holding AG and the Remuneration Report.

Receivables and liabilities. The terms and conditions governing receivables and liabilities are those commonly used by the relevant companies. The Valora Group has neither received any collateral for receivables nor has it issued any guarantees for liabilities.

<i>Receivables from related parties</i>	2015	2014
in CHF 000		
Receivables from associates	635	655
Receivables from other related parties	17	303
Total receivables	652	958

<i>Liabilities towards related parties</i>	2015	2014
in CHF 000		
Liabilities to associates	3	2
Liabilities towards other related parties	1 595	2 204
Total liabilities	1 598	2 206

Contingent liabilities and guarantees. There are no guarantees or contingent liabilities towards related parties.

37 EQUITY

<i>Shares outstanding</i>	2015	2014
in number of shares		
Total registered shares	3 435 599	3 435 599

Position at January 1	61 869	34 014
Increases in treasury stock	103 280	43 409
Decreases in treasury stock	-49 234	-15 554
Total treasury stock at December 31	115 915	61 869
Total shares outstanding (after deduction of treasury stock) at December 31	3 319 684	3 373 730
Average number of shares outstanding (after deduction of treasury stock)	3 358 171	3 388 061

A dividend of CHF 12.50 per share was paid in 2015 relating to the year 2014 (CHF 12.50 per share was paid in 2014 relating to the year 2013). Dividend distributions are based on net income for the year and retained earnings by the Valora Holding AG parent company.

The company's issued share capital comprises 3435599 shares of CHF 1.00 nominal value each. A conditional share capital of 84000 shares exists which the Board of Directors may use for existing or future management share plans. None of these shares had been issued at December 31, 2015.

At the Ordinary General Meeting held on April 18, 2013, Valora Holding AG shareholders granted the Board of Directors authority to raise up to CHF 250000 of additional share capital through the issue of up to 250000 shares of CHF 1.00 nominal value each at any time until April 18, 2015.

On April 9, 2013, Valora Holding AG issued CHF 120 million of perpetual, subordinated hybrid bonds. The first date at which the issuer may call these bonds for redemption is October 30, 2018. Until October 30, 2018, the annual coupon will be 4%. For subsequent five-year periods, the coupon will be determined on the basis of the mid-market rate for 5-year interest-rate swaps, plus a 500 basis-point spread, plus the original credit margin. The issuer's obligation to pay coupons on the bonds essentially depends on the dividend resolutions passed by the Ordinary General Meeting of Shareholders. The proceeds of the bond, minus CHF 902 thousand in transaction costs, qualify as equity.

38 SUBSEQUENT EVENTS

These consolidated financial statements were approved by the Board of Directors of Valora Holding AG on March 3, 2016. The Board of Directors recommends that the Ordinary General Meeting of Shareholders to be held on April 14, 2016 approve these financial statements.

REPORT OF THE STATUTORY AUDITOR TO THE GENERAL MEETING OF VALORA HOLDING AG, MUTTENZ

REPORT OF THE STATUTORY AUDITOR ON THE CONSOLIDATED FINANCIAL STATEMENTS

As statutory auditor, we have audited the accompanying consolidated financial statements of Valora Holding AG, which comprise the income statement, statement of comprehensive income, balance sheet, cash flow statement, statement of changes in equity and notes (pages 94 to 162), for the year ended 31 December 2015.

Board of Directors' responsibility. The Board of Directors is responsible for the preparation of these consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS) and the requirements of Swiss law. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system.

An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion. In our opinion, the consolidated financial statements for the year ended 31 December 2015 give a true and fair view of the financial position, the results of operations and the cash flows in accordance with the International Financial Reporting Standards (IFRS) and comply with Swiss law.

REPORT ON OTHER LEGAL REQUIREMENTS

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.
